

.Net architect

Who are we looking for?

- At least 5 years' experience in .Net Development
- Master or Bachelor degree
- High level of English
- Despite the fact that you are already on a high level, you still want to learn new things and are still excited about it. You like to discuss with fellow developers why you have chosen certain solution/technology.
- You not only know what Solid, SOA/micro services, Design patterns and Fallacies of distributed programming means, but you already applied it.
- Databases, EF, Angular/Vue.js/React/Xamarin and OAuth do not have many secrets for you anymore.
- You want to lead the team and guide junior developers.
- Developing is still one of your greatest talents.

What is your work description?

- You will be working on projects for our clients as a consultant.
- You will help to analyze, develop and test of the client's application. These applications are tailor made solutions.
- Our clients are companies located in Belgium.

What are we offering you?

- Working in a highly challenging environment with the latest technology
- Guidance with your career and your development
- Help with your move to Belgium
- **Mark conform salary**
- **Company car + fuel card**
- **13th month paid** (according to the months you worked that year) and **paid leave** (20 days a year after one year work) + 1 extra holiday per month worked
- Internet connection compensation of **50 euro (net) a month**
- Each billed day you get **17 euro (net)**
- After 4 years you will get a work permit that does not expire
- **Belgium social security**
- **First 2 months we will pay your residence** (airBnB or competitors)

- Permanent contract with us
